

Studying the impressions of other students

Study the mind maps closely and answer the following questions:

Divide the words and images on this mind map into 3 columns: those which tell us something positive about Africa, those which tell us something negative, and those which are neutral, and say something neither good nor bad.

Positive	Negative	Neutral

Which column has more words in it? What do you think are the reasons for this?

Did these students have the same ideas about Africa as you did? If they are different, how?

What countries in Africa do you think they were thinking about when they made this page? Does their representation of Africa cover all the countries? Give reasons for your answer

Prepare to present your answers to the class
